Konoha Wall Light By Marset

Description

The Konoha Wall Light is a versatile fixture capable of providing both direct and ambient lighting. The sconce features a slim tube with an integrated LED which can be rotated 360 degrees to aim its light. When the light is directed downwards, it can provide light to read next to a bedside or work over a desk. Or the light can be directed upward to reflect off of the dome shade to provide soft, ambient illumination. Note: This is a direct wire fixture and does not require a junction or receptacle box for installation. See installation instructions for more details.
