Versa Beam Outdoor 12V Marker Light

By Brilliance

Description

The Versa Beam 12V Marker Light can be used to achieve nearly any configuration in landscape lighting design. Because of the modular design, the Versa Beam is ideal for outdoor hardscape and in ground applications. All options share the same light engine and come fully assembled and ready to use out of the box. All options include a light engine with interchangeable 15, 30 and 60 degree optics. In hardscape and masonry applications, the Versa Beam is designed to be recessed into standard 1 inch electrical conduit, making rough-ins simple, without the need for complicated back boxes or pour sleeves. Note: Dimmable with most low voltage magnetic transformers, required and sold separately.
