Sit Set Chair

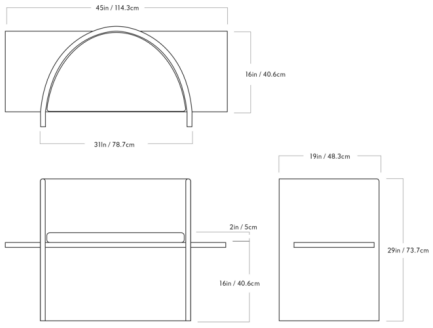

By Roll & Hill

Description

The Sit Set Chair possesses a modern, geometric silhouette constructed from solid wood using traditional joinery techniques without screws or other mechanical fasters. The chair's back and legs are formed by a coopered half-cylinder, which is intersected by a rectangular plane to form the seat and side shelving. A leather-upholstered cushion provides a comfortable seat and complements the natural look of the wood grain.

Shown in white oak / caramel leather
