## El Cubo Table Lamp

By Carpyen

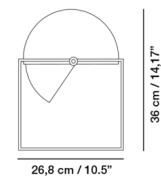

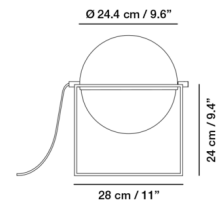

### Description

When creating the El Cubo Table Lamp, designer Gabriel Teixid envisioned an adjustable lamp that could be adjusted to change the direction and amount of light. His solution was the cleverly geometric El Cubo, composed of two overlapping metal hemispheres supported by an open square frame. The sphere can be opened to allow more light to escape and increase the brightness. On/off switch located on cord.

Shown in black / blue grey metallic
