Skynest C Ceiling Light

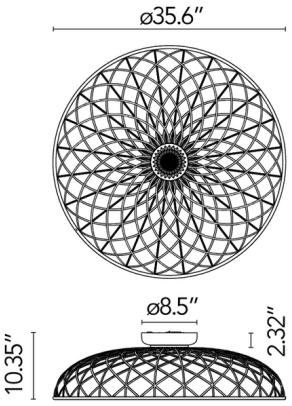

By FLOS

Description

Elevate your ceiling with the ethereal beauty of the Flos Skynest C Ceiling Light, an airy dome crafted from a captivating interplay of lit and unlit curved rods, each gracefully wrapped in thin woven fabric mesh. Every luminous rod is ingeniously powered by discreet micro-connectors at the top, and covered with a sophisticated two-toned mesh, featuring a colored outer side and a pristine white inner side for optimal light emission from its integrated LED module.A built-in balancing system at the top of the dome ensures impeccable fixture stability, while a sturdy aluminum ring at the rim provides essential structural integrity. Beyond its visually striking form, the Skynest C champions environmental responsibility: its fabric mesh is made from recycled and recyclable polyester, making it a truly eco-friendly option. Furthermore, the entire fixture is assembled without any glue, allowing it to be fully separated for future recycling. The Skynest C is an exceptional choice for those seeking a beautiful, sustainable, and truly innovative lighting solution that brings a soft, diffused glow and a touch of modern artistry to any contemporary space.
