Ample Ceiling Fan with Color Select Light

By Kichler

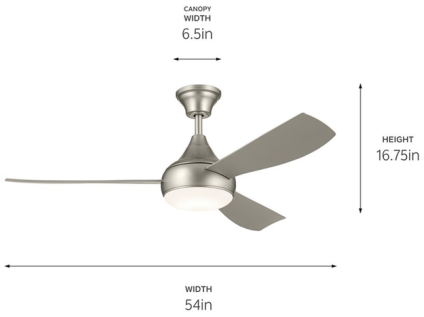

DAMP

Description

Versatile in style and function, the Ample Ceiling Fan is the ideal solution for your indoor or covered outdoor space. Its simple, contemporary form displays sleek curves and works well in soft modern settings. Built with an integrated LED light and glass diffuser, it casts pleasant ambient lighting across the room, and color temperature (CCT) can be set at 3000K or 5000K during installation. A 65K CoolTouch full function hand control with wall cradle is included and enables motor on/off, 3 speeds, forward and reverse, and light on/off with full-range dimming. The 65K frequencies help prevent remote control interference in hospitality and multi-family applications. The fan also includes dual mounting -- it can be installed as a flush mount suitable for low-ceiling applications or with a downrod for longer hanging heights. The light kit is removable and can be replaced with the included decorative cover. Optional accessories are sold separately.

Shown in brushed nickel / silver
