Axel Chandelier

By Troy Lighting

Description

Departing from a conventional chandelier layout, the Axel Chandelier presents an innovative design with a simplified construction. Shaded lamps are distributed at each axis of the rhombus-shaped frame with arms stacked together and arrayed at 120 degrees. The metal framework is Soft Black, complemented by Patina Brass socket cups and reflectors. The stylish perforations on the shades serve a dual purpose, adding a decorative element while creating an interplay of light on both sides of the fixture.

Shown in patina brass / black

Specifications
