Vine Plug-In Spot Wall Light

By Artemide

Description

Experience focused light and captivating design with the Artemide Vine Plug-In Spot Wall Light. This fixture stands out with its open, ring-shaped lamp head, which integrates a sleek LED light strip to deliver powerful, directional illumination. The Vine's exceptional articulation allows for incredible flexibility: its head can be rotated nearly 360 degrees to direct light up or down, offering versatile lighting effects. Additionally, the lamp head can be tilted to project light outward into the room or back towards the wall, providing precise control over your spotlighting needs. The subtly curving segments of the lamp's form create a striking silhouette with strong graphic character, ensuring this wall light is as visually compelling as it is functional. A dimmer switch is conveniently located directly on the lamp head, allowing for effortless adjustment of light intensity. With its simple plug-in installation, the Vine Plug-In Spot Wall Light is an ideal choice for adding a modern, adjustable accent light that highlights artwork, architectural features, or specific areas with contemporary elegance.
