Vine Plug-In Wall Light

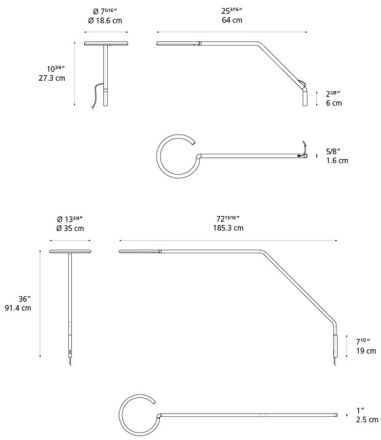

By Artemide

Description

Introducing the Artemide Vine Plug-In Wall Light, a captivating design that blends sculptural form with dynamic functionality. This fixture features an open, ring-shaped lamp head gracefully supported by a thin, segmented stem. The true brilliance of the Vine lies in its extraordinary articulation: the head can be rotated nearly 360 degrees to direct light either upwards or downwards, providing versatile ambient or accent illumination. Beyond rotation, the lamp head can also be tilted to aim light outward into the room or back towards the lamp's base, allowing for precise light control.The angled segments of the lamp's stem create a striking silhouette with a strong graphic character, ensuring the Vine is not just a light source but a piece of modern art on your wall. A convenient dimmer switch is discreetly located directly on the lamp head, offering effortless control over brightness. Its plug-in design makes installation incredibly simple, allowing you to easily add a touch of contemporary elegance and flexible lighting to any space without complex wiring.
