## Tubulaire Chandelier By Audo Copenhagen

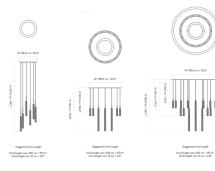

## Description

The Tubulaire Chandelier features a ring of slim, cylindrical aluminum shades which have been anodized to create a bronzed brass surface finish. The shades' reeded texture adds visual interest and contrasts the pendants' sleek silhouettes with a tactile element. Tubulaire's simple but elegant aesthetic is perfect for adding a dramatic accent to any room, especially when the pendants are installed at different heights to create a cascade of light.

Shown in black/bronzed brass
