Limbus Modular Pendant

By Lumina Italia

Description

Despite its simple expression, the Limbus Modular Pendant utilizes precision metalworking and glass engineering to offer a perfect blend of form and function. Taking its name from the Latin word for edge or border, the pendant is composed of two glass hemispheres encircled by a metal band to create a stylish downlight reminiscent of a glowing star in the night sky. The lower glass hemisphere houses the light source and has been engineered to direct light downwards while reducing unpleasant glare. Note: The ceiling canopy is not included and must be purchased separately. A maximum of 4 pendants can be suspended from one canopy.

Shown in black / clear

Specifications
