H Track Current Limiter Slim Single Live End Power Feed

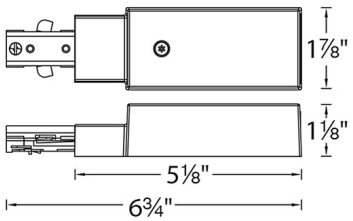

By WAC Lighting

Description

The H Track Current Limiter Slim Single Live End Power Feed can be used to power your WAC H Track system, and includes a circuit breaker that prevents the system from being overloaded. Once the max load for the current limiter is reached, the limiter cuts off power to the track system, and the load must be reduced before the limiter can be reset to power the system. Current limiters are often used to meet energy efficiency requirements. An on/off switch on the side allows easy testing. Can be installed as a surface or suspension mounted current limiter. Notes: Does not cover a standard 4 inch junction box. Some finishes are not available in every amperage rating.
