Nova Sculpture Set of 2

By Currey & Company

Description

A nod to rock crystal, the Nova Sculpture Set of 2 features a ball that sits atop rectangular bases; both the orbs and the supports made of clear composite swirling with white. The billowing effect, which mimics milk that has been poured into water and frozen in time, gives the decorative sculptures a sense of movement. Though these will be unobtrusive decorative objects given their transparency, they will effervesce when light strikes them. Because of the nature of the material, each sculpture will vary slightly.
