## WiZ RGB+Tunable White Ground Spot Extension Kit

By WiZ

### Description

Use the WiZ Color Changing Ground Spot Extension Kit with your Starter Kit and existing Wi-Fi (no hub required) using the free WiZ mobile app or voice control to light for your outdoor landscape areas. This extension includes one spot light with ground spike and hardware needed to connect to starter kit. Up to five lights can be connected. Using the WiZ app, you can turn the lights on and off, and dim or brighten the light output. The lights can produce up to 16-million colors or thousands of shades of white light with a color temperature between 2700K (Warm White) to 5000K (Cool White). You can choose a different color or shade for each of the lights or light them all the same color. You can also create your own lighting schedules and control the lights when you're away from home. You can use voice commands to control your WiZ lights through your favorite Voice Assistant, such as Amazon Alexa or Hey Google. You can also control your lights by using voice commands on your smartphone using Google Assistant and Siri Shortcuts. WiZ lighting products also integrate with other apps, such as IFTTT (If This, Then That), that trigger events based on conditions from other apps. NOTE: Requires WiZ RGB+Tunable White Starter Kit.
