Baron Extendable Table

By Connubia

Description

The Baron Extendable Table features a rectangular top in ceramic-glass composite, frame and perimeter legs in metal. The Baron table contains a practical mechanism within it that can increase the support surface. By pulling the frame towards you, the two legs equipped with hidden wheels slide to one side allowing the extension to be extracted. With a simple rotation movement, the extension mounted on metal rails comes out of its housing and aligns itself with the top. The triangular legs always remain perimeter, ensuring maximum comfort for all guests. Choose the Baron extendable table to furnish the dining room.
