Black Flag Swing Arm Wall Light By FLOS

Description

The Black Flag Swing Arm Wall Light offers versatile, functional lighting thanks to its extendable aluminum arm reaching out from a sleek wall-mounted frame. Black Flag delivers both direct downlight and indirect uplight from its integrated LEDs, which can be dimmed independently with dedicated buttons on the frame. The fixture's large size gives it an industrial-inspired, sculptural presence that will make a bold statement in any interior. Black Flag is available in a Standard version with static 2700K LEDs or a Pro version with Tunable White LEDs. The tunable LEDs can be easily set to 2700/3000/4000/5000K or adjusted to any color temperature in between by continuously holding the button. The Pro version also features an adaptive eco-mode to automatically dim or brighten the light to maintain constant brightness as ambient light from the room changes throughout the day. The junction box cover panels are available in matching Matte Black or paintable primer.

Specifications
