Black Flag Swing Arm Wall Light

By FLOS

Description

Make a striking architectural statement with the Flos Black Flag Swing Arm Wall Light, a truly versatile and functional luminaire. This imposing fixture commands attention with its extendable aluminum arm, dramatically reaching out from a sleek wall-mounted frame. More than just a visual marvel, Black Flag delivers exceptional lighting performance, providing both direct downlight and indirect uplight from its integrated LEDs. What truly sets Black Flag apart is its advanced functionality. Opt for the Standard version with consistent 2700K LEDs for warm, inviting light. For unparalleled control, choose the Pro version with Tunable White LEDs, allowing you to effortlessly shift color temperatures from 2700K (warm) to 5000K (cool daylight), or anywhere in between, by simply holding a dedicated button. The Pro version further impresses with an adaptive eco-mode that intelligently dims or brightens the light to maintain a constant, desired brightness as ambient light fluctuates throughout the day. With junction box cover panels available in matching Matte Black or a paintable primer, Black Flag integrates seamlessly into any design vision. Ideal for: Large living rooms, open-concept dining areas, or architectural spaces needing a powerful, adjustable, and visually arresting lighting solution. Unmatched Features: Dramatic Scale: An industrial-inspired, sculptural presence for bold interiors. Dual Light Output: Combines direct downlight with ambient uplight. Integrated LED Technology: Energy-efficient and long-lasting illumination. Tunable White (Pro Version): Adjust color temperature from warm to cool. Adaptive Eco-Mode (Pro Version): Smartly maintains consistent brightness. Extendable Arm: Offers extensive reach and flexible light positioning.

Specifications

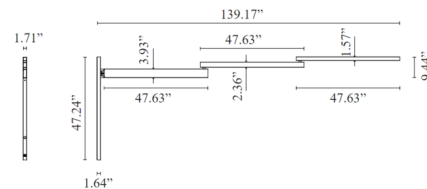

COLOR N/A
