Bevel LED Mirror

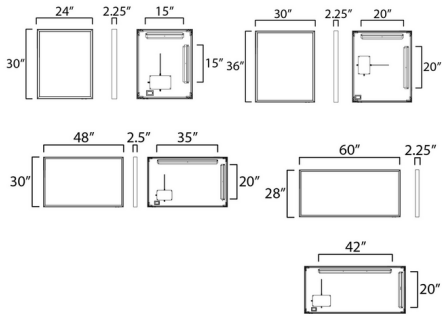

By Et2

Description

White Acrylic diffusers are miter cut and beveled along the edge of the Bevel LED Mirror frame allowing for wider, and brighter lighting. Robust in size, the mirror features excellent construction and 5CCT light selection using a discreet touch switch on the frames edge. Hardwire the mirrors to a dimmer switch to control the brightness and the memory function on the LED will recall the chosen color temperature of the previous setting.

Shown in satin nickel / mirror
