Constellation Table Lamp

By Lasvit

Description

Created by New York-based architect and designer David Rockwell, the Constellation Table Lamp was inspired by the celestial ceiling mural of Grand Central Terminal, which depicts a series of constellations in the night sky. The table lamp features a copper-colored glass globe with an integrated LED light source set within a stainless steel frame. A slim stem elevates the light source to create stunning visual focal point in any interior. On/off switch on cord.

Specifications
