Reed Acoustic Ceiling Light

By Seascape

Description

The Reed Acoustic Ceiling Flush Light adds both style and practicality to your space. It offers ideal ambient lighting and uses acoustic technology to absorb sound waves. This is especially useful in large rooms with high ceilings. The Reed fixture material comes from recycled plastic bottles that absorb sound and reduce reverberation, which helps quiet noisy open-space environments, no matter the ceiling types. Two-fold benefits are high design and noise reduction.

Shown in brushed nickel / felt navy

Specifications
