TruLine 1A 5W 24VDC Tunable White 2K6K Plaster-In LED System

By PureEdge Lighting

Description

The TruLine 1A Tunable White Plaster-In 24VDC LED system provides smooth and glare-free general illumination using designer-grade high CRI LEDs. TruLine 1A recesses within 5/8 inch drywall without any joist modification. The slim extrusions, LED strips, and lenses are field-cuttable. Includes 5 watts/foot LED module in 2K6K 2000K-6500K Tunable White color temperature option. Included components: Junction Box, Adjustable Mounting Bars, TruLine 1A Channel(s), End Cap, Take-Up Box, Mounting Straps, Drywall Screws, LED Soft Strip, and Lens(es). Can be installed on a single surface, join runs on multiple planes from wall to ceiling, or from one wall to an adjacent wall. Use TruLine 1A Build-It-Yourself (BIY) with pre-formed components to create desired configurations including mitered picture frame and outside or inside corners for room wrapping installations. Note: A DMX color changing power supply or 2XK 0-10V 2-Channel power supply is required and sold separately. 0-10V requires two dimmers -- one for intensity and one for color temperature. DMX power supply must be used with PureEdge controller (CDMX1-2XK). Product is built to order

Shown in white

Specifications

COLOR	N/A
