VL45 Radiohus Pendant

By Louis Poulsen

Description

The Radiohus VL45 Pendant was originally designed in the 1940s for the Radiohus building in Copenhagen, Denmark. The opening at the bottom of the glass produces downwards directed light, while the translucent glass provides uniform, general and diffused illumination. These delicate yet bold pieces look great on their own, or grouped together in multiple sizes for a more dramatic effect. Note: The 14.6 inch size is only available with Gloss White shade.
