Squiggle Infinity Chandelier

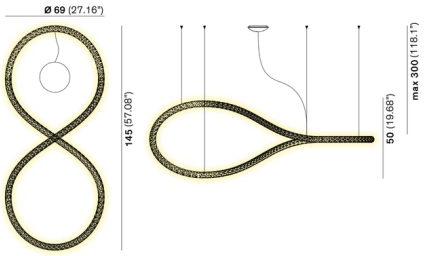

By Rotaliana by Luminart

Description

Inspired by Lucio Fontana's neon structure created for the 9th Triennale of Milan, the Squiggle Infinity Chandelier traces a sinuous path of light for a bold and graphic expression. The chandelier's organic, overlapping shape appears as a figure eight when viewed from below, and it seems to morph and change shape as it is viewed from different angles. The exterior of the lamp is covered with a geometric pattern of irregular hexagons, creating a unique visual texture.
