Tobu Wall Light

By Rotaliana by Luminart

Description

With a shape reminiscent of traditional torches, the Tobu Wall Light was designed for spaces with high ceilings such as museums, theatres, and even some residences. The sconce features a pair of cylindrical shades, each housing an LED light source, which can be independently angled up to 30 degrees to aim their light upwards at artwork or architectural features. A dimmer switch on the bottom of each cylinder allows the two lights to be dimmed independently.

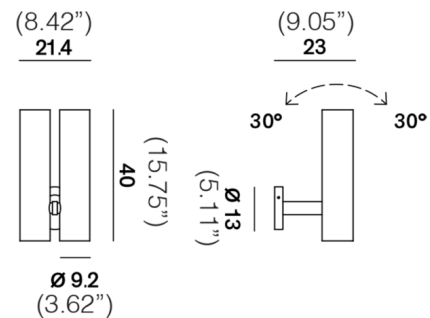

Shown in matte black
