Dots Directional Grazing Wall Light

By Vibia

Description

The Dots Directional Grazing Wall Light provides functional lighting to illuminate a wall from a compact, circular housing. The sconce can be rotated 360 degrees to direct the beam of light precisely where it is needed. While the light can be used on its own to provide ambient light or highlight an architectural feature on the wall, it can also be installed alongside other fixtures from the Dots collection to create unique arrangements. Available with TRIAC/ELV dimmable driver or On/Off (non-dimmable).
