## Upholstered Blueprint Chair By Form & Refine

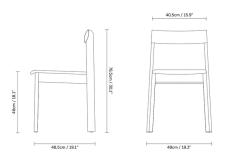

## Description

The Upholstered Blueprint Chair is an archetypal chair created by Form & Refine. The unusual seat shape, which was inspired by human anatomy, promotes good posture and provides excellent seating comfort. The organically shaped solid backrest gives the chair a minimalist and personal style. The combination of strong, solid legs and the Hallingdal upholstery lends the chair a surprisingly light and stunningly sharp visual appearance. The exquisite backrest is steam-bent and made from a single solid piece of wood.

Shown in natural oak / gray
