J-us Mini Chandelier

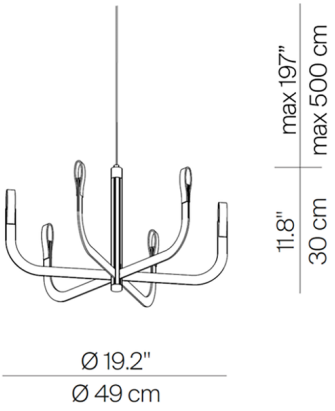

By Luceplan

Description

The J-us is an unusual interpretation of the traditional chandelier with arms. The central cylindrical aluminum structure provides an electrified track on which to attach the copper and fiberglass arms of the chandelier. The arms are positioned freely by inserting and sliding them into the structure slots and are completely concealed from view. The luminous performance and dynamic design offers great visual appeal. Phase cut dimming. NOTE: Additional configurations available upon request.
