Stripe Side Chair

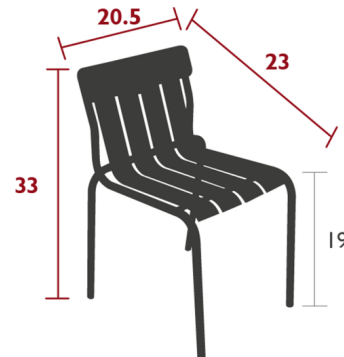

By Fermob

Description

Originally, the Stripe chair was developed by Fermob as part of a special project at the request of the designer Matali Crasset. She wanted to create a seat to encourage people to talk and share, and that would be easy to move from one table to another, for the new Mini R fast food concept of the student services organization CROUS. This is how Stripe came into being: an aluminum chair with gentle curves, comfortable to use with a handle on the back of the backrest. Tubular aluminum frame, Curved aluminum slats seat, Curved aluminum, slats backrest, Handle on the back of the backrest for easier handling, Silence pads, Stacking capacity : x 8 (Height - stacked : 43,5 in.), Product enhancement : Improved stacking
