Fiordlys Pendant By Slamp

Description

The Fiordlys Pendant was inspired by the sinuous movement of the northern lights and waves crashing against the cliffs of Norway to introduce the calming presence of nature into an interior. Fiordlys' is composed of concentric shells in Slamp's signature technopolymers Opalflex and Lentiflex. The innermost Opalflex layer features a soft golden-white hue, while the middle Lentiflex layer features a ribbed texture that can create unexpected iridescent effects. The outermost layer is made of Opalflex with a metallized foil that creates dazzling patterns of light and shadow as light passes through. Triac / Trailing Edge dimmable.
