Intelligent Logic Controller Din Rail

By PureEdge Lighting

Description

The 96W 24V TruColor Intelligent Logic Controller is a cutting-edge networkable controller designed specifically for 5-channel constant voltage luminaires. It surpasses traditional LED ballasts, LED drivers, and DMX controllers by integrating PureEdge's TruColor technology. This combination ensures precise control over all five channels, delivering highly accurate Correlated Color Temperature (CCT) levels and vibrant color output. This makes the Intelligent Bridge Box the ideal choice for managing 5-channel luminaires with precision and flexibility. This component is intended to be used in conjunction with at least one per application of GDIN-UNITY1.
