## Night Birds Mini Pendant

By Brokis

## Description

Inspired by the freedom and abandon of a bird in flight, the Night Birds Mini Pendant uses a unique production technology which involves melting glass into a mold and bending it. The various options depict the wing motions of a bird in flight, which will create a dramatic effect when multiple pendants are installed in a group. Night Birds Mini is available in Brokisglass, which is made from melting fragments of glass which retain their original shape in the finished piece, or Massif glass which possesses a more uniform appearance with gradual color transitions. Includes 4.7 inch mounting plate to cover a standard US junction box.

## Specifications

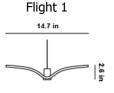

COLOR	SS
BODY FINISH Silver Body / White Canop	ЭУ
