## Floating Forest Mobile

By Michael Anastassiades

### Description

The Floating Forest is a collection of brass objects designed to be placed on top of a drinking glass to germinate seeds or fruit pits. Both the object itself and the sprouted seed provide an elegant decorative element. The Floating Forest Mobile is intended for use with acorns by suspending the seed just above the surface of the water. The elongated stem protrudes from the side of the glass to serve as a counterweight. Includes brass object only; glass and seeds not included.

Shown in polished brass
