## Mobile 8 Chandelier By Michael Anastassiades

### Description

The Mobile 8 Chandelier is a delicate structure balanced in perfect equilibrium. Constructed following the principles of a mobile, it rotates freely and delicately, creating an ever-changing lighting configuration unique to the space it occupies. Each Mobile Chandelier is individually tailored to ensure the balance of its hand-crafted patinated-brass components. Every piece is unique in its dimension and compositional balance, due to the varying weight of the mouth-blown opaline glass. Includes a paintable junction box cover which will cover standard 4 inch junction boxes. The j-box cover extends beyond the fixture and will be visible. The total drop from the ceiling to the bottom of the fixture is specified to order and is not field adjustable: 22.1 inch minimum to 98.8 inch maximum.

### Specifications

COLOR . . . . . Opal  
BODY FINISH . . . . . Black Patina  
WATTAGE . . . . . 9W
