Skylight Round Color-Select LED Mirror By Oxygen by Quorum

Description

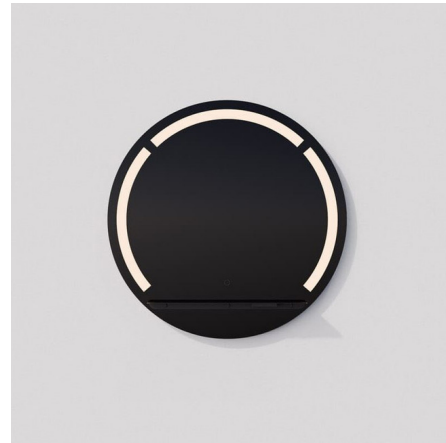

The Skylight Color-Select LED Mirror is a marvel of Italian design. Its exclusive GHOST Lighting technology conceals the light source when switched off, maximizing the functional reflective area of the mirror. The lights in the different sections of the mirror can be activated separately, and they feature CCT selectability (4000K or 6000K) and dimmability for creating the perfect environment. These settings are controlled using the intuitive touch sensor near the bottom of the mirror.
