## Linear Undercabinet Remote Power Supply By WAC Lighting

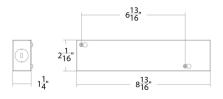

## Description

The Linear Undercabinet Power Supply is a 100-277V input / 24V output low voltage Class 2 electronic transformer designed to be used with WAC Lighting undercabinet lighting systems. Class 2 powersupplies are intrinsically safer power supplies because they are compartmentalized to allow no greater than 5 amps of current to be drawn on each compartment. Enclosure cover is easy to remove. Power supply has knockouts on three sides with clips for line voltage wiring. Secondary wiring for class 2 power supplies do not require conduit sheathed cable or clamp wiring techniques. This power supply has a low minimum load requirement of either 3W, 6W, or 9.6W to allow the use of LED products. May be dimmedusing a TRIAC or electronic low voltage dimmer.
