Artell Rectangular Color-Select Mirror

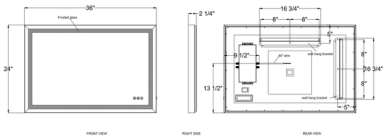

By Eurofase

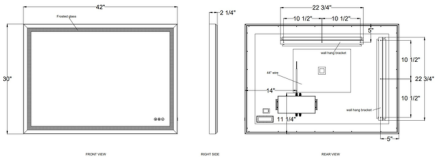

Description

The Artell Rectangular LED Mirror features a beveled metal frame for a sleek, stylish look that will complement a wide variety of decor styles. A thin LED strip runs parallel to the frame to direct light outwards, and a backlight adds a halo of light against the wall. The color temperature can be switched between warm 3000K, neutral 45000K, or cool 6500K to suit any environment. Buttons on the face of the mirror control the color temperature, on/off/dimming, and the built-in glass defogger. May be installed vertically or horizontally.

Shown in brushed gold / mirror
