Aire Pendant By FARO Barcelona

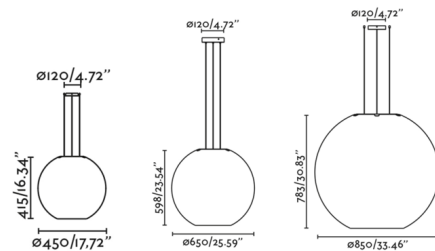

Description

The Aire Pendant blends technology and sustainability. The shade is made of recycled PETG and has a transparent, textured finish. The 3D-printed shapes are like air bubbles that fill the space, giving it personality and elegance. Thanks to the crystalline appearance and surface texture, the light is magically diffused through the shade. The Aire can be used individually or with other luminaires from the collection to create unique light compositions.

Shown in white / transparent
