Molecule Chandelier

By hollis+morris

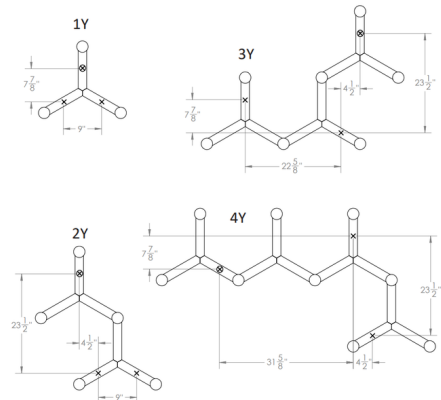

Description

Inspired by the dynamic bonds of atomic structures, the Molecule Chandelier explores the intersection of nature, design, and illumination. Based in the patterns found in molecular forms, this sculptural chandelier is composed of plated Y-shaped connections that form the bonds in a larger whole. Choose between sizes and finishes to suit any architectural context. Note: Dimmable with ELV or 0-10V Dimmers.

Shown in white / white oak

Specifications
