## Adorne Wired Remote Smart Dimmer with Netatmo By Legrand Adorne

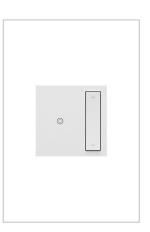

## Description

The adorne Wired Remote Smart Dimmer allows you to communicate wirelessly back to an installed (required) primary smart dimmer. The remote dimmer must first be paired with a Smart Gateway with Netatmo (sold separately) and then associated, through the Legrand Home + Control app, with another already installed primary smart dimmer. This makes it ideal for locations where you are converting existing 3-way or multi-location dimming control to become part of your smart home. In new construction it allows for faster installation with the removal of the traveler wire requirement as each wired remote communicates wirelessly back to the primary device, saving on installation time and cost. Note: Required Smart Gateway with Netatmo sold separately. Must be paired with a Primary Smart Dimmer. Compatible with Smart Home Platforms: Can be onboarded to Amazon Alexa, Google Home and Apple Home, as well as other smart home platforms for greater home integration. Complete the look with a screwless adorne Wall Plate, sold separately.
