Adorne Wired Remote Smart Switch with Netatmo
## By Legrand Adorne

Description

The adorne Wired Remote Smart Switch allows you to hardwire remote control of a primary smart switch, dimmer, plug-in or receptacle. The Remote Smart Switch is line voltage powered and communicates wirelessly back to a primary device that the switch controls. The remote switch must first be paired with a Smart Gateway with Netatmo (sold separately) and then with another already installed primary smart device through the Legrand Home+ Control app. The Remote Smart Switch is ideal for locations where you are converting traditional 3-way or multi-location control to become part of your smart home. In new construction it allows for faster installation with the removal of the traveler wire requirement as each wired remote communicates wirelessly back to the primary device, saving on installation time and cost.Note: Required Smart Gateway with Netatmo sold separately. Must be paired with a Primary Smart Switch, Dimmer, Plug-In or Outlet through the Legrand Home+ Control app. Compatible with Smart Home Platforms: Can be onboarded to Amazon Alexa, Google Home and Apple Home, as well as other smart home platforms for greater home integration. Complete the look with a screwless adorne wall plate, sold separately.

Shown in white
