Bloom Arc Plug In Wall Light

By Nova of California

Description

Inspired by the flowing elegance of underwire fashion design, the Bloom Wall Arc Lamp redefines wall lighting with sculptural grace and soft ambient light. Originally conceptualized by Mervyn Weitz in 1976, this design draws from his signature cloud series - where steel wire framing and translucent materials come together to create glowing, ethereal forms. Mounted directly to the wall, this space-saving arc lamp features a white satin underwire-style shade with an internal diffuser that diffuses light with elegance. In-line dimmer on cord.

Shown in black nickel / white

Specifications
