LBB01 Linear Pendant

By Nemo

Description

For the Casa de Vidro, a symbolic project of Brazilian modernist architecture, Lina Bo Bardi designed in 1950 LBB01, a paradigm in the world of lighting. An essential and geometric design in which lines and volumes touch and intersect, in total continuity with the design style of the house in So Paulo. The telescopic stem and 340 degree adjustable diffusers in black painted aluminum allow direct and indirect lighting, while the interior finish is matte white.

Specifications
