Strand VX Double Outdoor Wall Light

By Maxim Lighting

Description

A study in simplicity, the Strand VX Double Outdoor Wall Light reimagines the outdoor lantern with clean architectural lines and an open, glass-free design. Twin vertical bars form a geometric frame that cradles the hood above--now available in expanded sizes that include new up and down light configurations for enhanced illumination. Crafted from Maxim's proprietary Vivex composite, this durable fixture withstands the toughest environments, from coastal humidity to intense UV exposure. The fixture features discreet, high-output LED modules recessed in the hood and base, casting a focused beam upward and downward while preserving dark sky compliance. The result is a striking silhouette that blends modern minimalism with long-lasting performance.
