## Angle 2.0 Pendant By SkLO

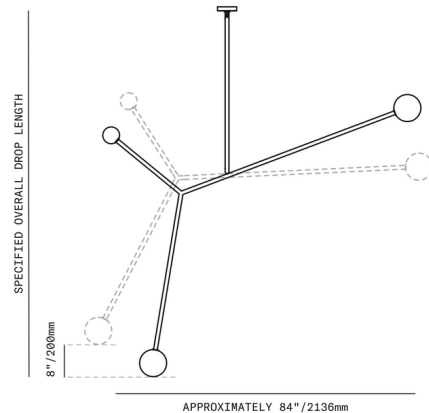

### Description

The Angle 2.0 Pendant offers a striking but also light and airy composition with its sleek tubular brass frame and minimalist glass globe diffusers. The angled, asymmetrical frame creates a dynamic look. Subtle variations in the weight of the handblown glass globes cause each pendant to tilt at a slightly different angle, making each pendant a one-of-a-kind object and adding understated variation when multiple pendants are installed together. Note: The overall height from the ceiling to the bottom of the fixture is specified to order and is not field adjustable. The minimum overall height is 71 inches; heights over 98 inches may be available for extra cost. Due to weight variations of the handblown glass diffusers, a +/- 4 inch variation in the overall height is possible. Compatible with sloped ceilings up to 30 degrees.

Shown in brushed brass / smoke
