Stella Pendant

By Pablo

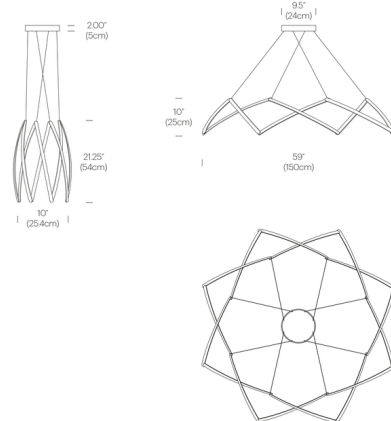

Description

The Stella Pendant is a dynamic light fixture that can be easily expanded from 10 inches in diameter to 59 inches to suit a wide variety of user needs. Stella is made up of multiple interwoven aluminum arms with pivoting joints that direct light inwards when the pendant is compacted and downwards when the pendant is expanded outward. The pendant can also be installed in an inverted position to direct light upwards. This playful and interactive design is ideally suited for use over tables or in entryway foyers. ELV, TRIAC, or 0-10V dimmable.
