Spokes 1 Ambient Pendant

By Foscarini

Description

The Spokes Ambient Pendant offers a wide variety of possibilities with its pair of independently adjustable LED light sources. One light source is aimed downward to provide direct lighting, perfect above a desktop or table. A conical louver and small frosted glass screen provide uniform light distribution while minimizing glare. The other light source is aimed upward, providing an ambient atmosphere and a striking pattern of light and shadow through Spokes' open frame. The Spokes Ambient Pendant can be connected to the Tuya app via Wi-Fi, which allows for control of the light sources from a smartphone. The Tuya app is compatible with the voice-activated systems Amazon Alexa, Apple Home, and Google Assistant to easily integrate the fixture into a Smart Home.
