TS24M 2-Circuit 24V Magnetic Surface/Suspended Track System

By PureEdge Lighting

Description

The TS24M Magnetic Track is a two-circuit 24VDC Surface Mount or Suspended track system allowing for two groups of fixtures to be controlled independently. The TS24M track system can be surface mounted or suspended from a stem at various drops, with slope ceiling adapter options for ceilings up to 60 degrees. The channels are offered in multiple lengths that can be further cut to size in the field. End, Center, L, T, and X Power Feeds and connectors provide more flexibility to make turns and create different configurations along the ceiling. Magnetic Track Heads, available in multiple color temperature and beam spread options, easily click into place allowing you to easily adjust the fixture direction, tilt and rotation. Designed for use with a 24VDC Universal remote power supply up to 40 feet away. Note: Remote power supply, power feed, track heads, and optional accessories sold separately.
