# Tagomago Wall Sconce

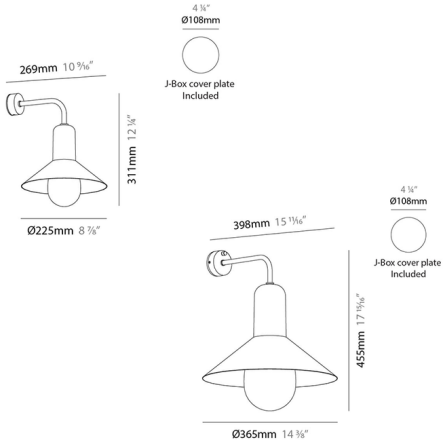

By ZANEEN design

## Description

Tagomago is a series born from the idea of creating a speck of light, like a lighthouse that guides ships to a port. Its form turns into a solid lamp which illuminates spaces without taking the lead role, creating atmospheres that draw you in. Tagomago is available in suspension and surface wall mounting types, with a stamped steel shade that houses an opal glass ball. The fixture generates pleasant atmospheres which, combined with its color finish, makes it very adaptable to a variety of spaces. Note: Not all options are available

Shown in metallic copper lacquer / opal
