Half Floor Lamp

By ZANEEN design

Description

Half collection performs new choreographies of light dancing in the air, portraying a cosmic journey and leaving subtle impressions. Like the moon, Half can turn on its own axis and at the same time shift just as the moon orbits the Earth, controlling its light and its shadows. It seems to continually change shape but this perception is just the angles from which you see the illuminated part of its surface. On/Off switch on cord.

Specifications
