Knife Edge Ceiling DIY Plaster In LED System

By PureEdge Lighting

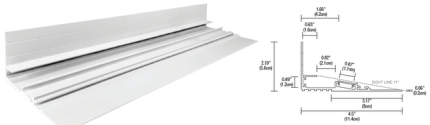

DAMP

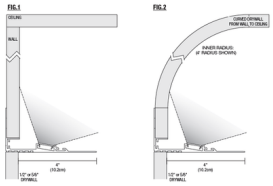

Description

The latest addition to the 24VDC plaster in family of products is the Knife Edge DIY (Do-It-Yourself) Ceiling. Knife Edge features a profile with no visible sightline of the asymmetric lens or light blocker, delivering a seamless, uniform visual field across adjacent surfaces. It's ideal for architectural, soffit, light cove, and accent lighting, engineered to support 1/2 inch or 5/8 inch thick drywall on the underside or mount directly to the wall. Knife Edge can be installed on a single surface, such as the perimeter of the ceiling, to accentuate or highlight coves and other architectural elements. Knife Edge Channel includes lens, mouning screws and end caps. Required DIY components, power supply, and LED strip sold separately.
